PROFESSIONAL SUMMARY

Gainsight NXT Level 3 certified Customer Success Systems Administrator and Business Systems Analyst who turns Customer Success strategy into scalable platform solutions for global B2B SaaS teams. Delivers accurate customer health and lifecycle data, automation that removes manual effort, and clear visibility into risk, renewal and expansion for leadership. Works closely with Customer Success leaders to shape requirements, drive adoption and change across regions, and resolve issues that span Gainsight, Salesforce and connected systems. Certified Salesforce Administrator with strong SQL and reporting skills.

CORE COMPETENCIES

Gainsight Administration	Customer 360 & Cockpit	Rules Engine	CTAs & Playbooks
Success Plans & Relationships	Health Scorecards	Journey Orchestrator	Reports & Dashboards
Customer Lifecycle Management	Requirements Gathering	Change Management & Adoption	User Enablement & Support
Process Documentation & Governance	Salesforce Administration	System Integrations	SQL & Data Quality

WORK EXPERIENCE

Systems Engineer — Business Systems Analyst, CRM & CS Operations — Apr 2024 – Present

Phorest

Contract · Remote / Dublin, Ireland · Gainsight NXT · Salesforce · Rocketlane · Zapier · Zendesk · Jira · Notion · HubSpot · Honeycomb · Looker · AWS S3

Platform Strategy & Customer Health

- Shaped Gainsight into the operating backbone for onboarding, adoption, risk and expansion across regions, aligning Customer 360, Cockpit, CTAs, Playbooks, Rules Engine and Scorecards with how Customer Success teams work.
- Restored confidence in customer health data by tracing scoring problems to their root causes, such as partial rule runs, inconsistent source data and sync failures, so CSMs and regional leadership can act on health signals.
- Improve user productivity and experience by resolving issues and enhancement requests and prioritising changes that reduce manual administrative effort.
- Keep lifecycle motions running as designed by resolving automation and customer-stage issues, including welcome-email failures, adoption-stage transitions and CTA assignment, and diagnosing health-score discrepancies caused by source-data and special-character errors.

Reporting & Executive Visibility

- Replaced manual spreadsheet reporting with live Gainsight dashboards on customer health, lifecycle stage and KPIs, giving teams and leadership current visibility for operational and executive decisions.
- Safeguard data integrity across Gainsight, Salesforce and Looker, catching discrepancies before they reach decision-makers.
- Give CSMs and regional leadership Gainsight views of health, risks and opportunities to prepare for QBRs and renewals.

Solution Design, Adoption & Change

- Partner with Customer Success, Marketing, Onboarding, Sales Operations and Engineering across DACH, UKI, North America and Australia to turn business needs into clear requirements, process maps and scalable Gainsight solutions.
- Deliver changes end to end, from design and UAT through release, backed by documented workflows and governance standards that keep users aligned and adoption high.
- Spotted Gainsight AI and MCP as a productivity opportunity for the team; completed Gainsight AI training and rolled out MCP to Customer Success users, keeping human validation over business logic and production changes.
- Maintain an inventory of automations, integration dependencies and data flows in Jira and Notion, giving the team a reliable reference for audits, troubleshooting and onboarding new users and admins.

Integrations & Platform Reliability

- Strengthened the reliability of the connected Customer Success stack (Gainsight, Salesforce, Zendesk, Rocketlane, Zapier, AWS S3) by diagnosing cross-platform failures and coordinating fixes.
- Audited the bi-directional Gainsight–Salesforce sync and resolved failures caused by character limits, contact fields, field-type conflicts, permissions and integration-user setup, validating each fix before returning processes to normal operation.
- Cut Zendesk-to-Gainsight sync latency 7x, getting customer data into health monitoring and follow-up actions sooner.

- Release Salesforce changes through sandbox testing and UAT, protecting production.

Jr. Customer Success Enablement Manager — Business Systems Analyst **Jan 2023 – Oct 2023**
Sitecore
Contract · London, UK · Gainsight NXT · Salesforce CPQ · Data Designer · Rules Engine · Journey Orchestrator · Amazon S3

- Translated reporting and communication needs from CSMs, Regional Directors and leadership into Gainsight solutions for a global Customer Success team.
- Kept data accurate for a global CSM user base through Gainsight MDA administration and regular data quality audits.
- Supported Salesforce and Amazon S3 data flows into Data Designer datasets, giving CSMs consistent parent and child account data.
- Built the global customer health dashboard (customer count, ARR, health, ARR trends and open risks/opportunities across parent and child companies) that regional leadership used weekly for QBR preparation and renewal planning.
- Ran Journey Orchestrator programs for NPS surveys, internal communications, promotions and customer messaging across segments.
- Worked with Sales Operations and Finance to streamline the Lead to Order Form process in Salesforce CPQ, and supported platform users day to day.

KEY PROJECTS

Customer Lifecycle Automation & Onboarding

- Designed the automation framework behind welcome, onboarding, NPS/CES, reconnect, expansion and EBR/QBR motions across regions, and resolved the automation failures that were disrupting the customer journey.

NA Premium Data Entry Workflow

- Replaced a Zendesk > Slack > spreadsheet process with automated CTAs, Playbook checklists and CTA Timeline visibility, backed by five acceptance criteria, a business case, effort estimate and training plan.

Rocketlane Onboarding Implementation

- Led the implementation of Rocketlane as the onboarding platform, integrating Salesforce and Zapier and building multi-language, multi-branch workflows with automated project assignment and stage-based communications; enabled the team through Notion and Loom documentation.

AWS S3 & Gainsight Data Pipeline

- Established an S3 data pipeline feeding Go Live, Payment/Sales and Reconnect history into Gainsight MDA, resolving data-type issues and documenting data flows for audits and onboarding.

Salesforce Platform Modernisation

- Supported retirement of legacy Apex Classes, Triggers and Platform Events, validating dependencies and production impact with developers to keep the release safe.

CRM Data Quality & Platform Governance

- Traced data-quality and sync issues across Gainsight, Salesforce, Zendesk, Rocketlane and Zapier to their source, whether data, connector, field mapping, automation logic or permissions, and documented findings for audits.

CERTIFICATIONS

- Gainsight NXT Level 1, 2 & 3 Certified — Gainsight
- Gainsight PX Certified — Gainsight
- Gainsight MCP Essentials — Gainsight · June 2026
- Certified Salesforce Administrator — Salesforce
- Rocketlane Administrator — Rocketlane · April 2025
- PostgreSQL — Udemy

TECHNICAL SKILLS

Customer Success Platforms: Gainsight NXT, Gainsight PX, Rocketlane
CRM & Revenue Operations: Salesforce Admin, Salesforce CPQ, HubSpot
Business Analysis: Requirements Gathering, Workflow Mapping, Solution Design, User Acceptance Testing, Jira, Notion
Data & Analytics: PostgreSQL, Looker, Honeycomb, Gainsight MDA, AWS S3, Data Pipelines
Integration & Automation: Zapier, Workato, Zendesk, Typeform, Cognito Forms, GitHub, Gainsight MCP, Gainsight CLI
Other: Slack, HTML, CSS, Cyberduck, Jira Service Desk, Claude, ChatGPT

EDUCATION

MSc Engineering · University of Hertfordshire, UK 2020–2022
B.Tech Mechanical Engineering · QIS College of Engineering and Technology, India 2015–2019
